Here's text boxes on cogeng & CHP. These are written as real-world examples; please let us know if you want more/different with regard to including policy or technology information.

Status: transport items except hybrids call-out box delivered; hybrid coming. I'm checking on whether we can get you the Pulte piece.

Subject: NEPD Recommendations

Joe

This is a follow-up to your call last Friday with Rob Brenner, Tom Gibson, and me. Attached is the write up of all the NSR-related recommendations that EPA believes should be in the NEPD report. If we need to discuss this at a principle's meeting, we would anticipate circulating this plus the NSR background piece that was previously circulated. However, we continue to believe that NSR was appropriately addressed in a previous principle's meeting.

I believe that Tom and Rob will want to talk to you about this again - I think we are trying to set up something for Wednesday or Thursday.

I didn't catch Jean's last name, so could you please forward this to her?

Thanks,

Lorie Schmidt

Subject: chapter 8 figures and graphics

Jay,

These are the figures and graphics that went over for chapter 8 but I think the editor stripped out the figure names so I no longer know which one is figure 3 or 4, etc. Figures and graphics are not to be confused with photos (I do not have the final list of photos you sent over after our conversation two weeks ago Friday).

Doug,

Thanks. This chapter is ancient (well over two months old). We sent in comments several weeks ago (FE's were included). I would wait and see what the next version looks like, although I am not confident it will address all your concerns. I'll ask the WH where chapter 4 stands.
