NEPA_Chap 2 Outline.doc
Here are sections 1, 2, 4, and 5.

Thank you all for pushing so hard - we have a lot of very good material here.

Attending Monday
Larry Pettis (FE)
Cook (NE)
Mary Beth Zimmerman, John Sullivan (EE)
Bob Kripowicz (FE)
Margot Anderson (PO)
Paula Scaliingi (SO)
Joe Kiellher (OSEC)
Joe Stier or Crystal Ball (BPA)
What did I miss?

Subject: Citations  

The attached three documents cover citations for different parts of Chapter 5. I tried to merge them into one document but got totally fouled up with the MS Word draft feature, which I don't understand. Some cites were missed in obscure sections (e.g., hydro, oil power), but they don't look controversial to me.
Citations are done on Chapter 6. See attached.

- Mike York and Tom
Margot, here's a resend of chapter 2, the last attachment on this page.

Margot,

I didn't have Bill Breeds(SP?) email. Please forward to him.

We have all of the information responded to already. I will merge Chapter 1 together and simply forward the rest. I'll attach our reviews so far for 2, 4, 5. Chapter one to follow shortly.

Andy

The Honorable Spencer Abraham
Secretary
U.S. Department of Energy
1000 Independence Avenue, S.W.
Washington, D.C. 20585

Dear Secretary Abraham,

During your interview last Sunday on This Week, you confirmed that cutting funding for energy efficiency and renewable energy programs by as much as 30 percent is being considered. I assume that this is happening, at least in part, in an Energy Task Force headed by Vice President Cheney. My concern, based on your further remarks, is that you and this task force are not receiving the information necessary to make well-informed decisions. "We're going to look at these programs which have been widely scorned and criticized of not having returned a very good investment for the taxpayers..." I know of program examples that deserve scorn and criticism however; I also know of programs that have demonstrated great present and potential future value. My concern is that the only group being heard is a group that has only scorn and criticism.

Your goal is appropriate: (U.S. Chamber of Commerce, National Energy Summit), "...to make sure that America's energy needs of the next 20 years are met; that we succeed in—in confronting that challenge." You also indicated the need for a diverse energy supply policy, "It will be founded on the understanding that diversity of supply means security of supply ... and that a broad mix of supply options—coal to windmills, nuclear to natural gas—will help protect consumers against price spikes and supply disruptions." This timeframe is also appropriate for further development of diverse energy supplies. I have direct experience with photovoltaic programs that have been highly successful. Photovoltaic power generation has unique benefits including supplying clean power at the point of use during times of peak demand. Photovoltaic power generation is in its infancy relative to all other energy options. Even so, photovoltaic technology has demonstrated successes for present energy generation and, more importantly, demonstrated development successes indicating that photovoltaic technology will continue to meet DOE near-term and long-term (20 year) goals.

I request your support in all possible ways to insure well-informed decisions regarding our energy future. The photovoltaic option is one of multiple renewable energy technologies that deserve to be considered in the broad mix of energy supply options.

Best regards,

Dale E. Tarrant

Paul,

Margot
We provide our options on Wednesday (3/14). We will need to whittle down the proposals to date. Did you get my earlier e-mail with the list of options?
