Subject: Re: Weatherization funding (Document linked: Gail McKinley)

Rob, attached is a spreadsheet that lays out the WX request stream that was negotiated with DOE during preparations for the FY 2002 Presidential Budget Request. I spoke with Randy Steer, who indicated he had a conversation with you on this topic. As you can see in the spreadsheet, of course, this stream of requests assumes that Congress fully funds each year's presidential request. I am unaware of any agreed-to contingency funding request stream, or an agreed to method of adjusting the request stream, should Congress not appropriate the full amount of the request. As you are aware, the funding request stream results in a cumulative additional funding amount of $1.4 billion over ten years, which is consistent with President Bush's campaign website, and exceeds the $1.2 billion figure included in the National Energy Policy. If you have an alternative stream of requests for WX, please forward that to Tom Heavy, who will investigate and reconcile the streams with you. (See attached file: wxadds2002-2011.xls.)

Subject: Weatherization funding

Hi Jerry -

Please read the FY 2002 DOE letter to states that was just posted to the web in full. This letter authorizes each state to spend a maximum of $277 million to tackle the weatherization challenge in FY 2002.

Best,

[Redacted]

Gail McKinley

To: Jerry Dion/EE/DOE@DOE cc: Robert_Sandoi@omb.eop.gov, Kathy. tyer@hq.doe.gov, Mark Ginsberg/EE/DOE@DOE, Randy Steer/EE/DOE@DOE, Buddy Garland/EE/DOE@DOE, Gregory Reamy/EE/DOE@DOE

Subject: Re: Weatherization funding

The subject of today's message is the funding for the Weatherization Assistance Program (WAP). The White House has recommended a $1.35 billion increase for energy efficiency programs for fiscal year 2002, which is $1 billion more than the President's request in the budget proposal. The recommendation is based on the 2001 Energy Independence and Security Act and the 2001 Energy Policy Act. The recommendation includes funding for the Weatherization Assistance Program, which provides grants to state and local governments to help low-income households improve their energy efficiency. The recommendation also includes funding for the Weatherization Technical Assistance Program, which provides technical assistance to states and communities to help them implement the Weatherization Assistance Program.

Some important information with respect to the matter of $1.4 billion vs. $1.2 billion. The $1.4 billion is stated in the NEP, not in the President's campaign website. In the NEP overview, page xv, there is a bulleted list of goals. One of the goals is to expand the Weatherization Assistance Program, annually increasing funding by $1.4 billion over 10 years. Furthermore, it is the $1.4 billion figure which is consistent with the NEP statement here and also in the text of the recommendation section. The projected increase "will roughly double the spending during that period on weatherization." It is the $1.4 billion figure which does roughly double the Program, per the following calculation: When the President first made his statement of intention, the Weatherization Program's funding level (i.e., for Program year 2000) was $135 million. Another $135 million each year for ten years would be an increase of $1.35 billion. Rounds to $1.4 billion. So, when you star

Page 4

12915
Subject: Re: Weatherization funding (see attached file: wXad-s2002-2011.xls) I apologize for the confusion, but I finally got my hands on the right numbers. Attached is the spreadsheet you sent me. I created a new tab called "BRD". It includes BA and OL numbers for the outyears based on the approved policy decision. The request for FY 2003 should be $281 mil, not $277 mil. Again, sorry for the confusion.
