Subject: FY02 Budget reviews
Fred - please review to ensure that the Policy & Management and Program Direction sections properly reflect the FTEs and other costs.

Fred - please bring Steve Von Vital up to review the IT sections.

Thanks,

Buddy

Subject: NEP 2-pagers reminders

Since we have to have our first draft of our 2-pagers to PO by COB today, we'd appreciate receiving each draft as you finish it, so that we can package and process them more quickly.

PS - Per Buddy's guidance on the text for the 02 Budget, I've asked for clarification regarding goal statements, performance measures and milestones. Any feedback you can give me on what you can do in these areas (via e-mail preferred) would be helpful.
Here are our first cuts, once scrubbed. I'm waiting on one more.

I sent this to Abe yesterday, but I understand he is out so I ask you to respond in his place:
Can you work on answering the editor's questions on this?

Joan, attached is the first chapter to edit. We will be sending you the next chapter as soon as it is available. If you have any questions, please call me at (202) 586-5669. Thanks!

Subject: Next week in Denver

Dear Colleagues,

I hope you got what you needed from me for the NEP on biofuels.

Next week I will be at the Office of Personnel Management's training center in Denver. I will stay at the Holiday Inn - Denver Southeast, 800-962-7672, 303-695-1700, 3200 S. Parker Rd., Denver, CO 80014.

Tien
Subject: DAS meeting

Abe wants to pass out copies of the current EERE drafts for the NEP at the DAS meeting this afternoon (with editor's changes). I will have 15 copies prepared. Margo just e-mailed a new draft of various chapters, but probably no need to have sector review.
The NEP is back! Please see the following from the Policy Office regarding March 14 deadline for energy policy write-ups. Please plan to meet at 2:30 on Monday, March 5 in the EE conference room, to coordinate our responses. We would be pleased to meet with any sector this afternoon or tomorrow (3:00 this afternoon is already taken) to discuss items of importance to you in a policy plan.

Mary Beth (6-7249)

Subject: Energy Policy Discussion

All,

On Monday at 1:00, we will be meeting in room 7B-040 to begin the discussion of energy policy options for the national energy policy (phase 2 of our efforts). Joe will be sending out guidance for our discussion (probably on Friday). We have been encouraged by the Task Force to think broadly and creatively about policy options. The Task Force is aiming for March 14 to complete this phase.

Again, thank you all for your extreme efforts over the last two weeks and extra thanks to those who provided the last round of comments on the 2/26 version. We are very close to buttoning up the "interim report" - the two chapters describing the issues that we have been working on. Special kudos to KIA for their patience on all the fact checking (it ain't over - I'll be calling for some graphic help later today).

Margot

Margot Anderson@HOMAIL on 03/01/2001 07:51:03 AM
Subject: NEP Policy Formation

A brief heads-up to let you know that the Vice President's energy task force is moving to policy formation. We will have an initial meeting on Monday, March 5 to get our guidance. Since the final report is due to the VP's office on March 14, however, we would like to get started now.

I've e-mailed a heads up to your analytical staffs, and we've set up meetings today with OPT and OTT. We'd be happy to do the same for the other offices later today (after 5:00) or tomorrow.

— Mary Beth (6-7249)

Subject: Energy Policy Discussion

All,

On Monday at 1:00, we will be meeting in room TB-440 to begin the discussion of energy policy options for the national energy policy (phase 2 of our efforts). Joe will be sending out guidance for our discussion (probably on Friday). We have been encouraged by the Task Force to think broadly and creatively about policy options. The Task Force is aiming for March 14 to complete this phase.

Again, thank you all for your extreme efforts over the last two weeks and extra thanks to those who provided the last round of comments on the 2/26 version. We are very close to buttoning up the "interim report" - the two chapters describing the issues that we have been working on. Special kudos to EIA for their patience on all the fact checking (it ain't over - I'll be calling for some graphic help later today).
